

Creamfinance ([www.creamfinance.com](http://www.creamfinance.com)) offers consumer finance services in 7 countries, and our team consists of more than 400 passionate employees. In 2017 Capitec, the biggest bank in South Africa ([www.capitecbank.co.za](http://www.capitecbank.co.za)) became one of our main shareholders and, given their ambitions and market position, it is just natural that also Creamfinance is addressing opportunities that are offered by markets we are or want to be present. In that respect, we would like to strengthen our professional capacity and are looking for a talented

## Junior Data Scientist

### Your key role will be to:

- Convert large datasets into business insights through analysis of often unconventional internal and external data sources;
- Research and apply statistical learning techniques to discover patterns in data;
- Build tools that enable, simplify, visualize or automate data analysis and its results;
- Contribute to improving various stages of our proprietary process of building predictive models.

### If you can prove that you have:

- Student or a graduate of statistics, computer science, mathematics or applied physics program;
- Ability to write stable and efficient code in R or Python, also preferably SQL;
- Passion to apply statistics and programming to understand and extract useful information from data;
- Strong ability to prioritize, reason and think critically;
- Very good communication skills, positive can-do attitude and persistence;
- Fluency in English.

### Then we will offer you:

- Work in an international environment for a rapidly growing company;
- Strong growth and learning opportunities among experienced Data Science team members;
- Gross salary in the range of 800 - 1200 EUR gross, health insurance and other benefits.

If you are interested, please send CV to [cv@creamfinance.com](mailto:cv@creamfinance.com) until November 30th, 2019.  
We will contact candidates who will qualify for the 2nd round.
